HIP POSITIONING BELTS—2 POINT HIP BELTS - SINGLE PULL ADJUSTABLE

Hip Width (HW) measured in a straight line between the top of each hip bone (iliac crest)

Measuring guide for pelvic positioning belt

Hip width—Sizing chart (mm)

Extra Small	130 - 220
Small	180 - 270
Medium	250 - 370
Large	330 - 460
Extra Large	440 <

Our pelvic belts come with two padded sections to ensure user comfort and correct pressure distribution. The nylon straps have been worked neatly into the padded sections. The padded parts are made of high-quality materials and are dirt and water-resistant.

The sizing is marked clearly on the inside of the belt and the trim strip on the nylon straps ensures correct symmetric settings. This also means you can use this to determine and check your adjustments.

ANKLE POSITIONING CUFFS

ANKLE CUFFS	
Ankle Circumference (A) mm	
Extra Small	< 180
Small	180-220
Medium	220-260
Large	> 260

Circumference measured over the rounded protuberance of the ankle (malleolus)

Ankle Positioning Cuffs keep the legs at the correct angle to provide a strong sitting position. If you also want to inhibit spasms, ankle positioning is an essential component in the positioning range.

Our ankle positioning device is ergonomic and provides the right amount of pressure and comfort levels. The adjustable straps mean the feet and legs still have the correct range of motion.
